

Q&A: BCOE Info Session

Is there a joint BS/MS program for Computer Science? Like a “4 and 1 Program” or “2 and 1 Program” for transfer students?

Yes, there is a BS/MS program that you can establish eligibility at the beginning of your senior year.

If I’m going to major in electrical engineering, what are my options for a double major?

It depends on your course-work. I recommend you meet with an academic advisor to explore this option and what major you will be pursuing as a double-major with Electrical Engineering.

How big is the engineering transfer center and is there a cap on how many students can join? Also, I know there was a sign in the ppt that said no food/drinks but is that rule concrete or loosely enforced since there was someone drinking coffee in the picture?

The engineering transfer student center could hold about 60 students at a time, it's an open communal space with various tables for studying/group work. There is no cap on how many students could join. It is open to all transfers. The no food/drinks sign is up for future reference. We have not had to enforce it yet. Students are good about cleaning up after themselves. We actually have free coffee during our study jam days which are every other week. I hope this helps!
