

Q&A: School of Public Policy

I am interested in attending grad school (Masters of Public Health) and would like to know what support is available for the application process/advising.

Great question. I will have Deisy address your question. On a side note. I work as the career counselor and internship coordinator for SPP. In addition, I have my MPH from UCLA and have spent the last 18 years as a Public Health professor at CSUSB. I would be happy to work with you in terms of advising and support for a potential MPH program. There are some great internships and fellowships in the area that are health policy based that I could steer you to as well. I look forward to talking with you.

Where can I find more information about the summer transition program?

I am attaching the link here!
